**Additional AMI work for Kindergarten**

😊 For Social Studies and Bible, talk about someone among your family, friends or community that might be sick or sad or lonely just now. Make a card for them. It could even be a Valentine's card where you let them know that you love them and God does too!

😊 Don't forget reading! Practice the little readers they have from school and anything else they are willing to take on. Spend some time on Starfall or another app that helps practice reading.

😊 Use blocks, Lego bricks or other small toys or objects to practice making teen numbers. Create a group of 10 items and then add extras to make a teen number. Take turns with your child testing each other.

😊 Continue your NEWSTART journal for Science.
